

Background

SAEGUSA & Partners (formerly Saegusa International Patent Office) was founded in 1946 by Mr. Hachiro Saegusa (1908-1975). Located in Osaka, Japan's second-largest industrial and commercial city, SAEGUSA is one of the nation's leading patent firms. In 2016, the firm will mark its 70th year in business.

In 1975, patent attorney Mr. Eiji Saegusa, took over as President. In 2015, patent attorney Mr. Masahito Hayashi was appointed President, and Mr. Saegusa assumed the role of Executive Advisor. Each of our presidents has been a patent attorney with expertise in chemistry. As this demonstrates, our greatest field of strength is in chemistry, and we have assisted numerous chemical-related companies with their patent applications and cases.

Since the firm was founded, SAEGUSA's patent attorneys have specialized in the technical fields of organic and inorganic chemistry, biotechnology, pharmaceuticals, foods, cosmetics, machinery, and electronics, as well as in design, and all forms of legal work in regard to trademarks and intellectual property rights. In cooperation with attorneys in more than 100 countries abroad, and with clients listed among the leading companies and research institutes both in Japan and around the world, SAEGUSA is an international patent firm with expertise in handling applications, rights acquisition, rights utilization, and rights disputes. To maintain its high level of professional service, SAEGUSA encourages its attorneys, technical specialists, and other legal staff to place a high priority on continually acquiring new skills and knowledge.

Services

Saegusa's well-organized team of professionals provides a wide range of services, which include: filing and prosecuting applications for patents, utility models, designs, trademarks and service marks, and the renewal of registered trademarks and service marks; filing and prosecuting international patent applications; filing Oppositions and Replies to Oppositions; Requests for Arbitration Decisions before the Commissioner; Demands for Trial, such as Trials against a Decision of Refusal, Trials for Invalidation, and Trials for Correction; Requests for official opinions on the technical scope of patents or utility models, and the scope of designs or effects of trademark rights; Demands for Retrial; representation for Requests for Arbitration Decisions before the Ministry of Economy, Trade and Industry; representation for Requests for Reconsideration under the Administrative Appeal Act; preparation of expert opinions; representation for Appeals before the Intellectual Property High Court against trial decisions, and opposition to decisions rendered by the Japan Patent Office; making statements upon appearance before a court, in connection with a patent, utility model, design, or trademark, with a party or an attorney-at-law; consultation, surveys, maintenance and management of industrial property rights; recording changes in title due to assignments, mergers, and successions; recording of licenses, changes in name or address, etc.; and handling foreign applications on behalf of Japanese clients and Japanese applications on behalf of foreign clients. Saegusa is fully equipped with the most up-to-date facilities, and provides efficient responses to our clients' needs. In addition, with video (Polycom) and telephonic conference systems installed in both our Osaka and Tokyo Offices, Saegusa is able to conduct secure conferences and meetings, whether in Japan or abroad.

Our Clients

Since 1946, SAEGUSA has represented a broad range of clients, from major companies, universities, and research institutions, to small entities and individual inventors from a wide variety of countries. To meet the broad-ranging demands of clients large and small throughout the world, SAEGUSA is dedicated to providing quality service, and continues to grow by adding highly qualified individuals to its loyal staff. We also actively and continually conduct in-house training for our staff to maintain a high level of professional service, and we provide our clients with lectures and seminars on intellectual property matters.

Organization

SAEGUSA & Partners and the Saegusa Intellectual Property Research Institute work together in close cooperation. SAEGUSA presently consists of more than 120 dedicated professionals, including almost 40 patent attorneys; among these are eight partner patent attorneys with extensive experience. The patent attorneys at SAEGUSA & Partners hold positions of leadership in our Chemical and Biotechnology Department, Mechanical and Electrical Department, Trademark and Design Department, IP Legal Department, IP Information Research Department and Translation Department.

SAEGUSA & PARTNERS

Since our foundation in 1946, Saegusa specialists in the fields of chemistry, biotechnology, machinery, electronics, trademarks, and designs have shared information on legal systems and case law in Japan and abroad; and, based on our key concepts of accuracy, speed, and integrity, worked toward continuous improvement.

Priority is given to doing our best for our clients.

Chemical and Biotechnology Department

This is the firm's longest-established department. The Chemical and Biotechnology Department can handle a broad range of technical fields, such as organic chemistry, resins and polymers, inorganic chemistry, metals, biotechnology, pharmaceuticals, foods, and cosmetics.

This department's work includes patent right acquisition procedures, as well as invalidation trials and litigation (for rescinding trial decisions and for infringement); additionally, the Chemical and Biotechnology Department has extensive experience and a proven track record in providing expert opinions. In particular, many of the procedures the department performs for the acquisition of patent rights are for Japanese clients filing applications abroad, in nearly the same number as Japanese clients filing applications in Japan. In addition to areas such as the U.S., the European Union, China, and Korea, the department is highly experienced in filing applications in other regions, including Southeast Asia, the Middle East, Africa, Latin America, and Oceania. Additionally, the department handles numerous cases for overseas clients filing applications in Japan.

Mechanical and Electrical Department

This department handles, in Japan and abroad, patent and utility model applications in a wide range of electrical- and electronics-related fields, including communications and computers, as well as in the fields of machinery, architecture, and civil engineering. The Mechanical and Electrical Department also specializes in the fields of data processing, digital signal processing, Internet-related technologies, and software. While covering a wide range of technological fields, they accurately handle the complex structures and circuits associated with those fields.

In addition, like the Chemical and Biotechnology Department, the Mechanical and Electrical Department handles numerous cases for overseas clients filing applications in Japan.

Trademark and Design Department

This department handles a wide range of trademark and design applications both in Japan and abroad. The Trademark and Design Department assists in filing many applications in Asian countries such as China, Korea, and India, as well as in countries such as the US, Brazil, and Russia.

This department also handles trademark- and design-related assignments, license negotiations, and contract drafting, as well as work related to unfair competition and copyrights. In order to ensure that clients' rights abroad are effectively secured and utilized, they conduct searches and negotiations in foreign countries, and assertively meet with the relevant authorities abroad. For designs, the department provides advice for strategic applications, taking into consideration the scope of rights. Drafting personnel with 3D CAD expertise also create drawings.

Organization

SAEGUSA Intellectual Property Research Institute (SIPRI)

The purpose of the Saegusa Intellectual Property Research Institute is to assist and enhance the work of the patent attorneys of Saegusa & Partners. In addition to management-related departments, SIPRI consists of the IP Information Research Department, the Case Law Research Department, the Translation Department, the Information Systems Department, and the IP Legal Department, all of which work in close cooperation with Saegusa & Partners.

IP Information Research Department

Divided into separate teams specializing in Japan (PCT), North and South America, Europe, and Asia, this department collects, organizes, and analyzes the most recent and important intellectual property information from these and other areas regarding patents, utility models, designs, trademarks, copyrights, and laws against unfair competition both in Japan and abroad. The most recent and important intellectual property information is shared within Saegusa & Partners, and sent to our clients as appropriate.

Case Law Research Department

Divided into teams dedicated to the fields of chemistry and biotechnology, machinery and electronics, and designs and trademarks, this department collects, organizes, and analyzes information on the most recent and important case law from these and other fields regarding patents, utility models, designs, trademarks, copyrights, and laws against unfair competition both in Japan and abroad. The most recent and important case law information is shared within Saegusa & Partners, and sent to our clients as appropriate.

Translation Department

This department of experienced translators includes graduates of U.S. universities and resident proofreaders who are native speakers of English, and provides translations in close cooperation with the technical specialists and patent attorneys of Saegusa & Partners.

Information Systems Department

This department serves to optimize companywide processes, through improvement and systemization based on consultation and analysis, to enable a fast and accurate workflow. In line with the diversification of digital data management, a patent management system (NaviOfficer) was introduced in 2010, thereby ensuring that work flows smoothly and securely. Contingency systems have also been established in the event of natural disasters and other unforeseen events; these systems include stabilizing the network environment, and mutual data backup of the Osaka and Tokyo Offices in order to enhance data maintenance and provide security against environmental effects.

IP Legal Department

This department provides filing- and rights acquisition-related legal consultation for patents, etc., both in Japan and abroad, such as for confidential agreements, material transfer agreements, joint research, licensing, and regulation and evaluation of employee inventions. The IP Legal Department also handles problems related to intellectual property rights, such as legal disputes and contract issues.

Location

SAEGUSA & PARTNERS

Kitahama TNK Building, 7-1, Dosho-machi 1-chome, Chuo-ku, Osaka-shi, Osaka 541-0045, Japan

[A reception desk is the 8th floor.]

Telephone: 81(Japan)-6-6203-0941

Facsimile: 81(Japan)-6-6222-1068

e-mail: mail@saegusa-pat.co.jp

Executive Advisor

Eiji SAEGUSA

■ Education and Personal History

1960 Graduated from Doshisha University with a bachelor's degree in Chemistry

1962 Registered as a patent attorney

1975 Assumed the office of president of Saegusa & Partners

1996 Received the Medal with Yellow Ribbon from the Japanese government

2005 Registered as a patent attorney receiving the additional indication (authorized to represent in specific infringement litigations)

2005 Lecture at Japan Intellectual Property Association (JIPA), Research Institute of Economy and Trade and Industry

2015 Assumed the office of executive adviser of Saegusa & Partners

■ Memberships

Patent Attorneys Association of Japan (JPAA), Industrial Property Law Association of Japan

■ Specialties

Organic Chemistry, Inorganic Chemistry, Polymer Chemistry

President

Masahito HAYASHI

■ Education and Personal History

1990 Graduated from Waseda University with a bachelor's degree in Chemistry

1992 Obtained a master's degree in Chemistry from the Graduate School of Waseda University

1992-2001 Worked for a pharmaceutical company

1999 Registered as a patent attorney

2001 Joined Saegusa & Partners

2004-2006 Member of Kyoto University's Invention Evaluation Committee

2008 Registered as a patent attorney receiving the additional indication (authorized to represent in specific infringement litigations)

2015 Assumed the office of President of Saegusa & Partners

■ Memberships

JPAA, AIPPI

■ Specialties

Organic Chemistry, Inorganic Chemistry, Polymer Chemistry, Pharmaceuticals

**Executive Vice President,
Tokyo Office Director and Partner**

Kenji SAITO

■ Education and Personal History

1984 Graduated from Hiroshima University with a bachelor's degree in Pharmacy

1986 Obtained a master's degree in Pharmacy from the Graduate School of Hiroshima University

1986-1989 Worked for a cosmetics company

1990 Joined Saegusa & Partners

1990 Registered as a patent attorney

Adviser to public agencies

■ Memberships

JPAA

■ Specialties

Organic Chemistry, Biochemistry, Biotechnology

**Executive Vice President
and Partner****Mutsuko NAKANO****■ Education and Personal History**

Graduated from Kyushu University with a bachelor's degree in Pharmaceutical Science
Obtained a masters degree in Pharmaceutical Science from the Graduate School of Kyushu University

Worked for the international research laboratories of a pharmaceutical manufacturer

1996 Joined Saegusa & Partners

1996 Registered as a patent attorney

2005 Registered as a patent attorney receiving the additional indication (authorized to represent in specific infringement litigations)

2007- Lecture at Shimane University

2009- Steering committee member of the Japan Intellectual Property Arbitration Center, Kansai Branch

2016 Steering committee chairperson of the Japan Intellectual Property Arbitration Center, Kansai Branch

2016- Adjunct lecturer at the Tohoku University School of Medicine, Department of Molecular Medicine and Therapy

2017- Japan Intellectual Property Arbitration Center Kansai branch branch chief
